

AASHRITHA N

Senior Software Engineer | Azure DevOps & CI/CD | PowerShell | YAML | IaC | C#.NET
+91 82176 92197 | codebyaash@gmail.com | Bengaluru, Karnataka, India | github.com/codebyaash

PROFESSIONAL SUMMARY

Senior Software Engineer with 5+ years of experience across backend engineering, Microsoft Azure, Infrastructure as Code, CI/CD, build and release automation, production support, and enterprise application delivery. Hands-on experience with Azure DevOps, YAML-based delivery workflows, PowerShell scripting, Bicep, ARM Templates, Terraform, Git, Docker, C# and .NET. Experienced in standardising repeatable deployment processes, automating manual engineering activities, troubleshooting build/deployment and production issues, and collaborating with architects, QA, product stakeholders and developers through Agile delivery.

TECHNICAL SKILLS

DevOps & CI/CD: Azure DevOps, CI/CD, YAML, build/release automation, GitHub Actions, Git

Scripting & Programming: PowerShell, C#, Python, JavaScript, TypeScript, SQL

Infrastructure as Code: Bicep, ARM Templates, Terraform, Azure CLI

Microsoft Azure: Azure Functions, API Management, Logic Apps, Service Bus, Event Grid, Key Vault, Azure Monitor

Backend & Integration: .NET, ASP.NET Core, RESTful APIs, Microservices, API Integration, JWT Authentication

Containers & Platforms: Docker, Kubernetes

Databases: SQL Server, PostgreSQL, MySQL

Engineering Practices: Deployment Automation, Debugging, Root Cause Analysis, Production Support, Agile, Code Review

PROFESSIONAL EXPERIENCE

Innominds | Senior Software Engineer | Microsoft Project | Aug 2024 - Present

- Engineer Azure-based enterprise solutions covering infrastructure automation, CI/CD, backend integration, deployment workflows, production support, and technical troubleshooting for Microsoft workloads.
- Create and maintain Azure DevOps build, validation, release, and deployment workflows to improve repeatability and reduce manual intervention across software delivery.
- Work with YAML-based pipeline configuration and reusable deployment patterns to support version-controlled, consistent engineering workflows across environments.
- Use PowerShell and Azure CLI scripting within cloud and deployment automation activities, supporting repeatable provisioning, configuration, validation, and operational tasks.
- Standardise Azure infrastructure provisioning using Bicep and ARM Templates, replacing repetitive manual configuration with version-controlled Infrastructure as Code; also work with Terraform concepts and tooling.
- Build Azure integrations using Functions, API Management, Logic Apps, Service Bus, and Event Grid, and develop reusable RESTful API components using C# and ASP.NET Core.
- Debug deployment and production issues through log analysis and root-cause investigation, implementing corrective fixes and operational improvements to strengthen service stability.
- Collaborate with architects, QA engineers, product stakeholders, and developers across design reviews, code reviews, sprint planning, implementation, validation, and release activities.

Accenture | Software Engineer | Jul 2021 - Jul 2024

- Delivered C# and .NET enhancements for enterprise applications, translating functional requirements into maintainable application components and supporting release delivery.
- Integrated RESTful APIs with SQL-backed workflows to support enterprise data exchange and business functionality.
- Troubleshoot application and production defects, coordinated with QA and engineering teams, validated fixes, and supported stable releases through Agile sprints.

PERSONAL PROJECTS

Modern Infrastructure Deployment Platform

Designed an Infrastructure as Code management platform for template-driven deployments, deployment history, environment tracking, resource visualisation, rollback workflows, and cost estimation. Demonstrates deployment automation and platform-engineering concepts.

Technologies: Next.js, React, Terraform, Microsoft Azure, Docker, PostgreSQL

AI CloudOps Assistant Platform

Built an AI-assisted cloud operations platform for log ingestion, incident management, infrastructure health monitoring, root-cause analysis, and remediation guidance, with authenticated APIs, PostgreSQL persistence and Docker-based services.

Technologies: FastAPI, Python, Next.js, PostgreSQL, Docker, Microsoft Azure, OpenAI APIs

WealthCompass

Designed a beginner-focused investment companion combining risk profiling, portfolio tracking, financial education, goal planning, and AI-assisted guidance, structured around backend APIs, cloud-synced data, and an extensible full-stack architecture.

Technologies: Next.js, FastAPI, PostgreSQL, OpenAI APIs, Supabase

CERTIFICATIONS

- AI Agents and Agentic AI with Python & Generative AI - Vanderbilt University, Jun 2026
- Claude Code: Software Engineering with Generative AI Agents - Vanderbilt University, Jun 2026
- Prompt Engineering for ChatGPT - Vanderbilt University, Jun 2026
- Introduction to Cloud Computing - IBM, Jun 2026
- Introduction to DevOps - IBM, Jun 2026
- Foundations of Project Management - Google, Jun 2026
- Project Initiation: Starting a Successful Project - Google, Jun 2026

EDUCATION

Bachelor of Technology | Vellore Institute of Technology | Jun 2017 - May 2021
