

AASHRITHA N

Senior Software Engineer | Backend & Integration Engineering | C# | .NET | Azure | REST APIs

+91 82176 92198 | codebyaash@gmail.com | Bengaluru, Karnataka, India | [GitHub](#) | [Portfolio](#)

SUMMARY

Senior Software Engineer with 5+ years of experience in backend and integration engineering, building enterprise applications, RESTful APIs, cloud services, and distributed system integrations. Hands-on expertise in C#, .NET, ASP.NET Core, SQL, Microsoft Azure, API Management, Azure Functions, Service Bus, Logic Apps, Infrastructure as Code, and CI/CD. Experienced in API design, event-driven integration, deployment automation, production troubleshooting, and root-cause analysis, with a focus on secure, scalable, reliable, and maintainable enterprise systems.

TECHNICAL SKILLS

Backend: C#, .NET, ASP.NET Core, REST APIs, Python, FastAPI, Microservices.

Azure & Integration: Azure Functions, API Management, Logic Apps, Service Bus, Event Grid, Key Vault.

DevOps & IaC: Azure DevOps, CI/CD, Bicep, ARM Templates, Terraform, Docker, Kubernetes, GitHub Actions, Git.

Data & Frontend: SQL Server, PostgreSQL, MySQL, React, Next.js, TypeScript.

PROFESSIONAL EXPERIENCE

Innominds | Senior Software Engineer - Backend & Integration Engineering | Microsoft Project | Aug 2024 - Present

Backend and integration engineering for enterprise Microsoft workloads, spanning API development, Azure messaging and orchestration, infrastructure automation, CI/CD, and production reliability.

- Engineered backend and integration services using C#, .NET, ASP.NET Core, Azure Functions, API Management, Logic Apps, Service Bus, and Event Grid to connect distributed enterprise applications and cloud services.
- Designed and implemented RESTful APIs and reusable integration components, applying clear API contracts, validation, error handling, and maintainable service boundaries for enterprise workflows.
- Built asynchronous and event-driven integration patterns with Azure Service Bus and Event Grid to decouple services and support reliable message exchange across cloud workloads.
- Implemented workflow orchestration with Azure Logic Apps and serverless processing with Azure Functions, selecting integration patterns based on business flow, processing, and scalability requirements.
- Standardized Azure resource provisioning through Bicep and ARM Templates, establishing version-controlled Infrastructure as Code for repeatable deployments across environments.
- Automated build, validation, and release workflows through Azure DevOps CI/CD, improving deployment consistency and reducing manual delivery steps.
- Diagnosed API, messaging, and production integration failures through logging, debugging, and root-cause analysis, implementing corrective fixes to improve service reliability.
- Collaborated with architects, QA engineers, product stakeholders, and developers during solution design, API reviews, code reviews, sprint planning, and release activities.

Accenture | Software Engineer - Integration Engineering | Jul 2021 - Jul 2024

Enterprise integration and backend development across APIs, data flows, middleware, SQL-backed applications, defect resolution, and production support.

- Developed and enhanced integration components using C# and .NET, translating business requirements into maintainable services and enterprise application workflows.
- Built and consumed RESTful APIs and web services to exchange data between enterprise applications, backend services, and downstream systems.
- Implemented SQL-based data access and integration logic, supporting reliable data movement, validation, transformation, and application processing.
- Supported middleware and enterprise integration workflows, troubleshooting interface failures, data issues, and service defects across connected systems.
- Investigated production incidents and integration defects, partnering with QA and dependent teams to identify root causes, validate fixes, and deliver stable releases.
- Worked within Agile delivery teams across requirement analysis, development, testing, deployment support, and production maintenance.

PROJECTS

AI CloudOps Assistant Platform

Built an AI-assisted cloud operations platform for log ingestion, incident management, infrastructure health monitoring, root-cause analysis, and remediation guidance. Implemented authenticated REST APIs, project-level data separation, PostgreSQL persistence, Docker-based services, and AI-generated incident summaries.

Technologies: FastAPI, Python, Next.js, PostgreSQL, Docker, Microsoft Azure, OpenAI APIs

GitHub Repository: [AI CloudOps Assistant](#)

Modern Infrastructure Deployment Platform

Designed an Infrastructure as Code management platform for template-driven deployments, deployment history, environment tracking, resource visualization, rollback workflows, and cost estimation. The project demonstrates cloud automation and platform-engineering concepts beyond application development.

Technologies: Next.js, React, Terraform, Microsoft Azure, Docker, PostgreSQL

GitHub Repository: [IDP](#)

WealthCompass

Designed a beginner-focused investment companion combining risk profiling, portfolio tracking, financial education, goal planning, and AI-assisted guidance. Structured the application around backend APIs, cloud-synced data, and an extensible full-stack architecture.

Technologies: Next.js, FastAPI, PostgreSQL, OpenAI APIs, Supabase

GitHub Repository: [WealthCompass](#)

TopologyX

Built an AI Architecture Copilot that converts natural-language requirements into Azure architecture recommendations, including diagrams, security reviews, monthly cost estimates, scaling guidance, and generated Bicep and Terraform. Implemented authenticated per-user projects, saved architecture runs and history, deterministic fallback generation, and optional OpenAI/Azure OpenAI enhancement.

Technologies: FastAPI, Python, Next.js, TypeScript, Tailwind CSS, React Flow, Monaco Editor, OpenAI/Azure OpenAI, Bicep, Terraform, Alembic

GitHub Repository: [TopologyX](#)

CERTIFICATIONS

Microsoft: Full-Stack Developer Professional Certificate, SQL Server Professional Certificate, Azure AI Fundamentals AI-900 Exam Prep Specialization, AI Agents: From Foundations to Applications Professional Certificate.

Vanderbilt University: Generative AI Software Engineering Specialization.

Google: Foundations of Project Management.

Corporate Finance Institute: Business Valuation.

EDUCATION

Bachelor of Technology | Vellore Institute of Technology | Jun 2017 - May 2021
